

# EUROCEIL NANO PERFORATED STRETCH CEILING PVC

## EC-TR-NP1040

Euroceil nano-perforated Stretch ceiling film is designed for the manufacture of acoustic ceilings. The material offers an optimum combination of perforation size and distribution on the surface, which leads to maximum sound absorption properties, without compromising on the aesthetics.

- PVC thickness (nominal) : 0.18 mm - 0.20 mm\*
- Perforation hole Diameter : 0.15mm
- Perforation density : 4,00,000 perforation holes / m<sup>2</sup>

The acoustic film is available in any desired colour in the three surface finishes Supermirror, Satin and Matt (Stellar), including a translucent version for backlit ceilings.

\* Thickness varies for different color & finish of PVC
